Zebrano and Slate MFC

MFC

Our stock MFC boards are carefully selected to provide a wide choice of woodgrains, solid colours and speciality finishes.

All MFC surfaces may show wear over time if subject to high levels of abrasion, more so on darker colours. For this reason we recommend the use of mouse mats with all MFC finishes.

Please note that these are samples for colour and pattern only, not material. If you would like a larger sample of any of the finishes please call Customer Service on 01384 400120 or email sales@sven.co.uk.

Colour accuracy

Due to variations in lighting and the limitations of print, variations in colour may occur between brochure illustrations and manufactured items. Samples of all our finishes are available on request from Customer Services.
