Smoked Oak Veneer

Veneers, lacquers and exotic veneers

We use wood veneers whose varying grain and figure emphasise the beauty and individuality of the wood. There may be natural variations in hue, grain and figure, and both knots and colouring arising from natural minerals in the wood. Walnut and Maple in particular have a directional nap, and may appear light from one side and yet dark if viewed from another side. All of these features, and more, are part of the character of a natural material. Most veneers change colour to some degree over time on exposure to light. Should you add additional items at a later date, there may be an initial colour mismatch that should even out over time.

Exotic veneers are most frequently specified for inlays or cable management tiles. They can be also be used on complete panels if desired.

Note that it is in the nature of these veneers that they encompass wide variations in structure and colour.

If you would like a larger sample of any of these finishes please call Customer Service on 01384 400120 or email sales@sven.co.uk.

Colour accuracy

Due to variations in lighting and the limitations of print, variations in colour may occur between brochure illustrations and manufactured items. Samples of all our finishes are available on request from Customer Services.
